

# Khabiruzzaman

WEB DEVELOPER · JAVASCRIPT · REACT · NODE.JS

Rajshahi, Bangladesh | khabiruzzaman@proton.me | [github.com/khabiruzzaman-dev](https://github.com/khabiruzzaman-dev)  
[linkedin.com/in/khabiruzzaman](https://linkedin.com/in/khabiruzzaman) | [khabiruzzaman.xyz](https://khabiruzzaman.xyz)

## PROFILE

Self-taught web developer with a vanilla-first JavaScript foundation, now extending into full-stack development with React, Express and MongoDB. Focused on clean interface design, well-structured code and secure, role-aware back ends. Seeking an internship or remote role to grow within an engineering team.

## SKILLS

|           |                                                             |
|-----------|-------------------------------------------------------------|
| Languages | JavaScript (ES6+), HTML5, CSS3                              |
| Frontend  | React, Tailwind CSS, Responsive Design, DOM Manipulation    |
| Backend   | Node.js, Express, REST APIs, JWT Authentication, Middleware |
| Database  | MongoDB, Mongoose                                           |
| Tools     | Git & GitHub, Postman, Vite, npm / Bun, Linux (Arch)        |

## PROJECTS

**Task Management System** — Full-Stack, Role-Based In development  
React 19, Vite, Tailwind CSS 4, Node.js, Express 5, MongoDB, Mongoose

- Building a role-based (admin / manager / worker) task app where server-side authorization and ownership checks limit each user to the data in their scope.
- Implemented JWT authentication with httpOnly-cookie refresh tokens, hashed token storage, token rotation and silent session restore.
- Structured the API in feature-based route / controller / service / model layers with consistent error and response handling.
- Built the React frontend with Context-based state, role-protected routes and a custom Tailwind design system.

**Stream** — Frontend [github.com/khabiruzzaman-codes/stream](https://github.com/khabiruzzaman-codes/stream)  
HTML5, CSS3, JavaScript, TMDB API

- Movie and TV discovery interface with home, search, detail and player pages, powered by live TMDB API data.
- Written in vanilla JavaScript without frameworks, with a reusable API layer and a clean multi-page structure.

**VeilLog** — Frontend [github.com/khabiruzzaman-codes/veillog](https://github.com/khabiruzzaman-codes/veillog)  
HTML5, CSS3, JavaScript

- Personal journaling and notes interface in vanilla JavaScript, with custom SVG icons and a minimal layout.

## EXPERIENCE

**Independent Developer** — Personal Projects, Remote 2024 – Present

- Design and build frontend and full-stack web projects end to end, from interface to REST API and database.
- Integrate third-party APIs and manage all work with Git and GitHub.
- Follow a vanilla-first approach: master the fundamentals, then adopt React and Tailwind where they add value.

## EDUCATION

**B.Sc. in Botany** — National University, Bangladesh 2024 – Ongoing
