FULL-STACK · VANILLA-FIRST · MEN
STACK

PROFILE

Full-stack web developer with a logic-driven, Vanilla-first approach to building end-to-end applications. I develop with a focus on purity and performance — from responsive UI architecture to scalable back-end workflows — prioritising speed, accessibility, and minimalist design over framework dependency.

SKILLS

Frontend

HTML5CSS3JavaScript (ES6+)Responsive Design

DOM Manipulation

Backend

Node.jsExpress.jsREST APIMiddleware

Authentication (JWT)

Database

MongoDBMongooseSchema DesignAggregation

Tools

Git & GitHubZedPostmannpmRender

PROJECTS

Stream

github.com/khabiruzzaman-codes/stream

Node.js · Express.js · MongoDB · Mongoose · TMDB API · HTML/CSS/JS

Full-stack movie and TV streaming platform integrating the TMDB API for live content discovery and search. Features watchlist management and a user ratings system with persistent MongoDB storage. RESTful Express backend with Mongoose schemas and a performant, framework-free vanilla JS frontend.

VeilLog

github.com/khabiruzzaman-codes/veillog

Node.js · Express.js · MongoDB · Mongoose · EJS · HTML/CSS/JS

Multi-module personal productivity app combining journals, notes, todos, and URL bookmarking under one authenticated account. Designed a RESTful API with Express, modelled user-scoped data with Mongoose schemas, and delivered a clean, dependency-light vanilla JS frontend.

WebDashboard

In development

Node.js · Express.js · MongoDB · Mongoose · HTML/CSS/JS

Currently in active development. Shipping soon — stay tuned.

EXPERIENCE

Junior Web Developer

2024 – Present

Freelance / Remote Projects

Developed and delivered client websites and web apps using HTML, CSS, JS, and Node.js with MongoDB backends. Integrated third-party APIs, managed deployments, and maintained codebases on GitHub.

EDUCATION

B.Sc. in Botany

National University, Bangladesh

2024 – Ongoing
